**Umweltbüro für
Berlin-Brandenburg e.V.**

**Environment Office for
Berlin-Brandenburg**

The Environment Office for Berlin-Brandenburg was formed in 1994.

Qualified members of the organisation, made up of Scientists, Engineers and Business Managers, has over the years engaged in research and development projects to proffer solutions to diverse environmental problems.

Their knowledge is constantly updated and rounded-up by further training and qualifications that are adapted to the up-to-date state of environment protection.

On the basis of this know-how and practical experience, the Environment Office is in the position to undertake environmental protection for industries, landscape, trade and community even at the European level.

In solving problems, specialists from different fields work together interdisciplinarily to guarantee comprehensive realisations in the face of current state of technology as allowed by environmental legislations.

The members of UBB inc. work both solely and jointly on document appraisal and planning on the following themes:

Environmental consultations for Enterprises in Berlin

- Waste management concepts and waste auditing for Berliner KMU:
ABB Kraftwerke Berlin GmbH
Köpenicker Metallverarbeitung und Werkzeugbau GmbH
for hospitals and nursing homes
- Environmental consultations for metal and wood-work industries
- Concept to reduce waste in the printing industry

Consumer protection information

- Evaluation of ecological labels:
- Database for evaluating existing food-stuffs eco-label
 - Database for evaluating construction/buildings and auxiliary materials from the viewpoint "eco-building"

Modular training in environmental and consumer protection

- Basic qualification in environmental and nature protection
- Informations on consumer protection
- The use of geographical information systems in nature protection
- Applications areas of chemical information databases
- Introductions to computer usage

(Training funded by ESF)

Municipal environmental consultations in different communes in the State of Brandenburg

- Evaluations of used agricultural areas
- Evaluations of suspected contaminated areas
- Investigations of possibilities to regreen water-bodies and biotopes
- Biotope mapping
- Position analysis on the use of wind and solar energy

Soil-air investigations

- Carrying out of soil-air measurements for diagnosis of gas related damage to trees in the streets of different districts in Berlin
- Valuations of trees according to the Koch Copsewood value-table to open claim to compensation

Co-operations with international partners from the European Union and Eastern Europe

- Organisation of workshops with partners from Russia, Poland, Bulgaria on different themes related to environmental protection in Berlin
- Organisation of international conferences in Poland and Bulgaria
- Conference with theme Geothermal with partners from Poland and Lithuania
- Database/Contact source for environmental firms from Central and Eastern Europe

(The above initiatives are funded by State and EU sponsor programs)
